

# CAPITAL SPENDING BY CATEGORY

Fiscal 2006-2015  
(\$ in Millions)

This illustrates the State's capital spending grouped by major funding categories from most to least spending. Spending for higher education and K through 12 school construction are annually one of the largest recipients of State capital funding. In recent years, spending for environmental programs has eclipsed all other spending categories as the State responds to funding needs related to the Watershed Implementation Plan but in fiscal 2016 higher education spending surpassed environmental program spending in part because the Governor's plan eliminated the use of general obligation bonds as a source of repayment of transfer tax transfers to the general fund programmed as preauthorizations in the previous capital budget bill.
